

Landfill Infrastructure Project Update

February 26, 2020

FRANKFORT, Ky. (Feb. 26, 2020) – We reported earlier this month that we are expanding the landfill gas system at Benson Valley Landfill as part of our efforts to manage the Landfill safely and responsibly, and to control the potential for off-site odor. Throughout the remainder of this week, the project construction crew will be staging equipment, welding gas piping, and installing some infrastructure on the outermost portion of the Landfill. We anticipate completion of the entire project by mid-May.

Early next week, we expect to begin drilling additional landfill gas wells on-site. To prevent the potential for off-site landfill odor during this project, we are deploying temporary odor control measures. As previously mentioned, since there are multiple sources of potential odor near Benson Valley Landfill, if you detect odor you believe is attributable to the Landfill, please contact us at (502) 209-3814, and we will investigate. We appreciate your understanding and patience.
