

Benson Valley Landfill to Begin Landfill Gas Collection & Control Construction Project

February 26, 2021

FRANKFORT, Ky. (Feb. 26, 2021) – Benson Valley Landfill is set to begin Phase 1 of a planned landfill gas collection and control system construction project next week. During this construction event, the landfill team will install at least seven new gas wells and associated infrastructure. These new wells will support existing infrastructure to collect additional landfill gas across the site. Weather permitting, the construction event is expected to conclude in early April, with Phase 2 beginning in early fall.

As a good neighbor and responsible operator, we take several precautions to control the potential for offsite odor during these kinds of events. Should you detect odor you believe is attributable to the Landfill, please contact us at bensovalley@republicservices.com, and we will send a team to investigate.
